
Mads Emmertsen

UX/UI Designer @ NOVAX A/S

Aarhus N, Denmark

Profile

I am an analytically-minded UI Designer with an MSc in Digital Design and extensive experience creating user-centric systems for the healthcare sector.

As a designer, I thrive in the space between big-picture strategy and pixel-perfect execution, with a dedicated focus on ensuring high digital accessibility (WCAG). I possess an in-depth knowledge of Figma, where I design and maintain UI components within design systems, translating complex user needs into intuitive user flows and high-fidelity prototypes.

I am a dedicated team player who enjoys collaborating across disciplines to ensure a seamless handoff from design to code.

Work Experience
