

Mads Emmertsen

UX/UI Designer

Aarhus N, Denmark

Profile

UX/UI designer with three years of experience in the healthcare sector and a master's degree in Digital Design. I have designed professional systems for school health nursing, general practice and substance abuse treatment, where users are busy professionals and precision matters. I maintain a design system in Figma, have modernised legacy systems into web solutions, and work daily with WCAG AA. I can also code HTML and CSS, which makes the handoff from design to code smooth.

My position at NOVAX has been eliminated due to organizational changes, and I am available for new opportunities. I am open to permanent positions and freelance work within healthcare and other industries.

Work Experience

2023 - dec. 2026
